SUMMARY

Product-minded full-stack engineer and solo builder focused on developer tools, workflow automation, agent systems, and performance-conscious software. Strong background in frontend architecture, interactive product engineering, and full-stack delivery across web, mobile, and API-driven systems.

SELECTED PRODUCTS & OPEN-SOURCE WORK

- **Webhook Debugger and Logger** — Enterprise-grade webhook testing suite for capturing, replaying, forwarding, validating, and mocking webhook traffic in real time.
- **agent-harness** — Tooling and workflow infrastructure for curated agent ecosystems and AI-assisted development workflows.
- **DataGuard** — Data quality and ETL validation product for CSV, Excel, JSON, and related structured-data workflows.
- **InterActNote** — Android-first call-time context and relationship notes product in active development.

EXPERIENCE

Frontend Engineer — Eagle 6

Feb 2018 – Mar 2022 - Built and maintained complex enterprise product modules involving document workflows, file management, permissions, large-file uploads, data visualization, and interactive system interfaces. - Implemented frontend for cloud storage, organization chart modeling, plugin-based document editing, and monitoring-related graph/map interfaces. - Improved maintainability and scalability through structured state management, reusable UI logic, and robust workflow handling.

Full-Stack Freelance Contractor — Upwork / Independent Client Work

May 2017 – Feb 2018 - Delivered full-stack web and mobile projects from implementation through deployment across varied client stacks and constraints. - Built apps, REST APIs, automation-heavy flows, and deployment setups across Angular, Ionic, PHP, MySQL, Apache, Nginx, and Azure-related environments. - Stabilized and extended inherited systems while contributing bug fixes back to open-source libraries where needed.

Founder / Owner — Goggle Hunt

May 2017 – Sep 2017 - Built, operated, marketed, and sold a Shopify dropshipping store targeting U.S. and European markets.

Earlier Roles

- **PHP Developer** — GMINNS (Jul 2015 – Apr 2016)
- **Web Developer** — COMITS (Jul 2014 – Mar 2015)

TECHNICAL SKILLS

Primary Focus: Developer tools, workflow automation, webhooks/APIs, agent systems, full-stack product engineering

Frontend: TypeScript, Angular, React, RxJS, Angular Material, SCSS, interactive UI architecture

Backend / Systems: Node.js, ASP.NET Core, PHP, API integrations, automation systems, structured-data workflows

Data / Delivery: MySQL, SQL Server, Docker, Azure, Linux deployments, Git, VS Code, WebStorm, Visual Studio

EDUCATION

M.C.S. — Master of Computer Science, Arid Agriculture University, Rawalpindi

B.Sc. — Computer, Statistics and Mathematics, University of the Punjab

CERTIFICATIONS / COURSEWORK

Selected Coursera coursework in machine learning strategy, deep learning best practices, TensorFlow, and big data / Hadoop fundamentals.

NOTES

This version is intentionally compressed for a one-page-style resume. Confirm exact dates/titles before final export.
